# Engineering Experience, Built Over Decades

Established in 1996 in Rajkot, Gujarat, Ganesh Brass Works is a manufacturer of non-ferrous engineering components in bronze, brass, copper and gunmetal. Our products are developed for demanding applications where dimensional accuracy, durability and dependable performance matter.

We manufacture both standard and customized components according to customer drawings, samples and specifications. Our capabilities combine casting, machining and finishing to support diverse industrial requirements from a single manufacturing partner.

|                                                                                |                                                                      |
|--------------------------------------------------------------------------------|----------------------------------------------------------------------|
| <b>BRONZE</b><br>Bushes, bearings, rings, gears and customized components.     | <b>BRASS</b><br>Precision components and application-specific parts. |
| <b>COPPER</b><br>Non-ferrous components for selected engineering applications. | <b>GUNMETAL</b><br>Heavy-duty bushes, bearings, gears and pulleys.   |

# Components for Demanding Applications

Our product portfolio covers critical non-ferrous components used across automotive, pumping, earthmoving and general engineering applications.

|                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                   |

# From Casting to Precision-Finished Components

Ganesh Brass Works combines established casting methods with machining and finishing capabilities to manufacture reliable non-ferrous components for different operating conditions.

|    |                                                                                                                      |
|----|----------------------------------------------------------------------------------------------------------------------|
| 01 | <b>MATERIAL SELECTION</b><br>Selecting suitable bronze, brass, copper or gunmetal based on application requirements. |
| 02 | <b>CASTING</b><br>Component formation through Sand, Shell Mould, Centrifugal and Continuous Casting processes.       |
| 03 | <b>MACHINING</b><br>Turning, drilling, milling and precision machining to achieve required dimensions and profiles.  |
| 04 | <b>INSPECTION &amp; FINISHING</b><br>Dimensional checks, finishing and final preparation before dispatch.            |

## Manufacturing Infrastructure

|                     |                                                |
|---------------------|------------------------------------------------|
| CNC & VMC           | Precision machining and component production   |
| Lathe / Turning     | Turning, boring and cylindrical component work |
| Radial Drilling     | Drilling operations for larger components      |
| Centrifugal Casting | Rotational casting for cylindrical components  |
| Continuous Casting  | Continuous non-ferrous material production     |
| Cutting & Finishing | Preparation and finishing for final components |

# Engineered Here. Trusted Worldwide.

Ganesh Brass Works supplies non-ferrous engineering components to customers across international markets, supporting automotive, submersible pump, earthmoving, industrial machinery and general engineering applications.

With manufacturing capabilities spanning casting, machining and customized component production, we work with customer drawings, samples and specifications to deliver application-focused solutions.
